

ABSTRACT OF THE DISCLOSURE

A charger adapter is composed of an adapter and a charger detachably and electrically mounted on the adapter. The adapter has a plug formed at a bottom surface thereof. A tongue is formed at an upper surface of the adapter. Two first elongated holes are defined through the tongue. Two teeth are respectively and elastically protruded from the first elongated holes and electrically connected with the connecting member. The charger has a notch defined at a bottom surface thereof for receiving the tongue. Two second elongated holes are defined through the notch. Two contacts are respectively provided in the second elongated holes and corresponding to the teeth. A chamber is defined at an upper surface of the charger.
